Experience

Full Stack Developer Oct 2022 – Present

Softic Digitech *Hyderabad, India*

- Designed and implemented a real-time alerts web application for industrial sensor deviations, leveraging modern web technologies.
- Integrated Siemens Insights Hub API to aggregate real-time sensor data, reducing system downtime by 40%.
- Developed and deployed backend microservices using Node.js and Express; built secure REST APIs and optimized data handling.
- Implemented Web Sockets and Web Hooks for real-time features, enabling smooth and reliable data updates.
- Collaborated in an Agile development team with daily standups, sprint planning, pair programming, and code reviews.
- Used PostgreSQL and optimized SQL queries for alert tracking and user management, improving database performance
- Automated CI pipelines using GitHub Actions, streamlining testing and deployment workflows.
- Created a Python-based monitoring script, improving issue response time by 45%.
- Introduced a smart alert system that improved stakeholder communication efficiency by 35%.
- Applied clean code practices and SOLID principles, contributing to technical backlog reduction.

Projects

Partner Home Inventory Management | *React, Node.js, TailwindCSS*

- Built a scalable, feature-rich platform for online Home Inventory ordering items with advanced filtering, authentication via OAuth.
- Implemented CI/CD using GitHub Actions.
- Enhanced front-end and back-end performance by 20% using Web Vitals, ensuring a seamless user experience.

Weather Forecasting Web App | *React, Node.js, TailwindCSS, MongoDB*

- Developed a responsive weather forecast web application using React.js, with a focus on mobile-first design.
- Real-time weather updates and a detailed 5-day weather forecast were implemented for the user's convenience.
- Integrated the OpenWeather API to get accurate and up-to-date weather data.
- Ensured a seamless user experience through robust error handling for API responses and user inputs.

Hungry Kitchen | *React, Express, Node.js, TailwindCSS*

- Built a scalable, feature-rich platform for online food ordering with advanced filtering, authentication via OAuth, and secure Stripe payment integration.
- Enhanced front-end and back-end performance by 20% using Web Vitals, ensuring a seamless user experience.

Technical Skills

Languages: JavaScript, Python, Java, HTML/CSS
Frontend: React, Angular, Redux, Responsive Design, Advanced CSS (Animations & Transitions)
Backend: Node.js, Express, REST APIs
Database: SQL, MongoDB
DevOps & Tools: Git, GitHub, Postman, CI/CD
Testing & Debugging: Jest, React DevTools, Chrome DevTools
Cloud Platforms: Netlify, Firebase, Vercel (Exploring GCP/PCF)
Frameworks & Libraries: TailwindCSS, Material-UI, Ant Design

Education

JB Institute of Engineering and Technology Hyderabad

Bachelor of Technology in Electrical and Electronics Engineering *Jun 2018 – Aug 2022*
